Journal of Fluid Mechanics **Volume 356 10 February 1998**

A. Stegner & V. Zeitlin From quasi-geostrophic to strongly nonlinear monopolar vortices in a paraboloidal shallow-water-layer experiment *page* 1

M. F. Miller, C. T. Bowman & M. G. Mungal An experimental investigation of the effects of compressibility on a turbulent reacting mixing layer 25

A. L. Yarin, M. Pfaffenlehner & C. Tropea On the acoustic levitation of droplets 65

H. Wong, D. Rumschitzki & C. Maldarelli Theory and experiment on the low-Reynolds-number expansion and contraction of a bubble pinned at a submerged tube tip 93

J. M. R. Graham The effect of a two-dimensional cascade of thin streamwise plates on homogeneous turbulence 125

M. S. Longuet-Higgins Vorticity and curvature at a free surface 149

K. Eckert, M. Bestehorn & A. Thess Square cells in surface-tension-driven Bénard convection: experiment and theory 155

T. P. Schulze & M. G. Worster A numerical investigation of steady convection in mushy layers during the directional solidification of binary alloys 199

P. A. Davidson On the application of the Kelvin–Arnol'd energy principle to the stability of forced two-dimensional inviscid flows 221

P. H. Chavanis & J. Sommeria Classification of robust isolated vortices in two-dimensional hydrodynamics 259

Y. Liu & D. K. P. Yue On generalized Bragg scattering of surface waves by bottom ripples 297

C. Härtel & L. Kleiser Analysis and modelling of subgrid-scale motions in near-wall turbulence 327

S. Leblanc & C. Cambon Effects of the Coriolis force on the stability of Stuart's vortices 353
